International	application No
T/AU20	03/000716

Basis of the report	-			
With regard to the elements of the international application:*				
X the international application as originally filed.				
the description, pages, as originally filed,				
pages , filed with the demand,				
pages, received on with the letter of	Ì			
the claims, pages, as originally filed,				
pages , as amended (together with any statement) under Article 19,				
pages, filed with the demand,				
pages, received on with the letter of				
the drawings, pages, as originally filed,	ļ			
pages, filed with the demand,				
pages, received on with the letter of				
the sequence listing part of the description:				
pages , as originally filed				
pages, filed with the demand				
pages, received on with the letter of				
With regard to the language, all the elements marked above were available or furnished to this Authority in the language in	- }			
which the international application was filed, unless other wise interested to this Authority in the following language which is:				
These elements were available of furnished to this Additivity in the language of a translation furnished for the purposes of international search (under Rule 23.1(b)).	-			
the language of publication of the international application (under Rule 48.3(b)).				
the language of publication of the language of	-			
the language of the translation furnished for the purposes of international preliminary examination (under Rules 55.2 and/or 55.3).				
and/or amino acid sequence disclosed in the international application, the international	Ì			
with regard to any nucleotite and/or analyse the basis of the sequence listing: preliminary examination was carried out on the basis of the sequence listing:				
contained in the international application in written form.				
filed together with the international application in computer readable form.				
furnished subsequently to this Authority in written form.	İ			
furnished subsequently to this Authority in computer readable form.	-			
The statement that the subsequently furnished written sequence listing does not go beyond the disclosure in the				
international application as fried has been furnished.  The statement that the information recorded in computer readable form is identical to the written sequence listing has				
been furnished				
4. The amendments have resulted in the cancellation of:				
the description, pages				
the claims, Nos.				
the drawings, sheets/fig.	to			
This report has been established as if (some of) the amendments had not been made, since they have been considered go beyond the disclosure as filed, as indicated in the Supplemental Box (Rule 70.2(c)).**				
* Replacement sheets which have been furnished to the receiving Office in response to an invitation under Article 14 are referred to in the Replacement sheets which have been furnished to the receiving Office in response to an invitation under Article 14 are referred to in the Replacement sheets which have been furnished to the receiving Office in response to an invitation under Article 14 are referred to in the Replacement sheets which have been furnished to the receiving Office in response to an invitation under Article 14 are referred to in the Replacement sheets which have been furnished to the receiving Office in response to an invitation under Article 14 are referred to in the Replacement sheets which have been furnished to the receiving Office in response to an invitation under Article 14 are referred to in the Replacement sheets which have been furnished to this report since they do not contain amendments (Rules 70.16 and 70.17).	iis			
report as "originally fleet" and are not distinct to the referred to under item 1 and annexed to this report				
** Any replacement sheet containing such amendments must be 19				

Non-establishment of opinion with regard to novelty, inver	itive step and industrial applicability
The questions whether the claimed invention appears to be novel, t industrially applicable have not been examined in respect of:	o involve an inventive step (to be nonobvious), or to be
the entire international application,	
X claims Nos: 1-40 (all in part).	
because:	
the said international application, or the said claims Nos. require an international preliminary examination (specify):	relate to the following subject matter which does not
the description, claims or drawings (indicate particular ele	ements below) or said claims Nos. are so unclear that no
meaningful opinion could be formed (specify):	
	·
·	
said claims Nos. 1-40 are so broadly drafted such that a search was therefore limited substantially to the exa cited documents are only a representative sample of	a complete search was not economically feasible. The imples and the compounds as named in claim 41. The fifthe citations that were found.
no international search report has been established for sa	id claim Nos.
2. A meaningful international preliminary examination cannot be acid sequence listing to comply with the standard provided for	carried out due to the failure of the nucleotide and/or amino in Annex C of the Administrative Instructions:
the written form has not been furnished or does not com	ply with the standard.
the computer readable form has not been furnished or do	es not comply with the standard.

Continued in Supplemental Sheet

International application No. T/AU2003/000716

#### Certain observations on the international application II.

le following observations on the clarity of the claims, description, and drawings or on the question whether the claims are fully pported by the description, are made:

The description at pages 71-72 is not clear because the substituent at position 2 is named as dodecanyl of compound 9) in example 9. However the substituent appears to have 20 carbons and may therefore be eicosanyl. This is pported by the use of the reagent eicosanol as indicated on page 72 line 1. See item 2.

Claims 18 and 41 are not fully supported by the description because the named compound dodecanyl-6-hydroxy-2iphthoate appears in both claims but does not concur with the examples. See item 1.

The description at page 52 line 7 is not clear in its reference to Figure 3 rather than Figure 4.

The description is not clear. Figure 3, page 13 line 2, page 98 line 14 indicate that the compound is a 3-sulphonic 2id. However, page 94 line 4-6, page 96 lines 4-5, page 97 line 4 and Table 2, page 98 lines 4-6 and 29-31, page 100 able 4 indicate that the compound is a 2-sulphonic acid.

- . The description is not clear in terms of the first five results in Table 5 page 102.
- . The description is not clear because there is no Figure 7 in Figures 1-13.

. Claim 4 is not clear because

- (a) The first definition on page 117 line 25 is incorrectly written and
- (b) At page 117 lines 27-28 there is no antecedent in claim 1 for R2 is (CR<sub>10</sub>R<sub>10'</sub>)<sub>m</sub>SO<sub>3</sub>H, (CR<sub>10</sub>-R<sub>10'</sub>)<sub>m</sub>SO<sub>3</sub>C<sub>1-20</sub>alkyl  $r (CR_{10}R_{10'})_m C_{2-20}$ alkenyl.
- . Claim 17 is not clear because there is no antecedent in claim 1 for
  - (a)  $(CH_2)_m R_{110}$  where  $R_{110}$  is  $C_{1-3}$  alkyl and
  - (b)  $R_{107}$  is hydroxy or cyano.
- ). Claims 31-40 are not clear because "q" is not defined.
- .0. Claim 41 is not fully supported by the description because compound 22 is not a compound of the invention.  $R_{102}$ annot be H or R<sub>106</sub>Y cannot be H.

- These documents were cited in the ISR.

The above documents at the locations specified in the ISR disclose compounds, compositions and/or methods that fall vithin the scope of claims 1-41. Therefore claims 1-41 are not novel and not inventive in light of the above locuments.

note that the cited documents are only a representative sample of the citations that were found.

### ndustrial Applicability

Claims 1-41 are directed to inhibiting cytokine or biological activity of macrophage migration inhibitory factor (MIF) and therefore satisfy the criteria for industrial applicability.
